## EU Vyhlásenie o zhode

Podľa nariadenia (EU) 2016/425

Výrobca: AnDum Protective Equipment Technology (Changzhou) Co.,

Ltd.

Adresa: No.216, Qianjie, Hengshanqiao Town, Changzhou Economic

Zone, Changzhou City, Jiangsu Province, China.

Európsky zástupca: MedPath GmbH

Adresa: Mies-van-der-Rohe-Strasse 8,80807 Munich, Germany

Filtering Half Mask - Respirátor

Klasifikácia: FFP2 NR Model produktu: AD-1001 Veľkosť produktu: 15 cm x 10 cm

farba Rôzne farby

Název výrobca: AnDum

Posudzovanie zhody Zhoda s typom založená na internej kontrole výroby a kontrolách

podle platnej direktívy: výrobkov pod dohľadom v náhodných intervaloch (modul C2) pod dohľadom notifikovaného orgánu NB 2163 Universal

Certification and Surveillance Service Trade Ltd. Co. (certifikát

č. 2163-PPE-640)

Platný standard: EN 149:2001 + Al:2009 Ochranné prostriedky dýchacích

orgánov

Respirátory na ochranu pred časticami. Požiadavky, skúšanie,

označovanie

Podpísaný subjekt týmto prehlasuje, že uvedené osobné ochranné prostriedky vyhovujú transpozícii do vnútroštátneho práva, ustanoveniam nariadenia Rady (EÚ) 2016/425 a základným požiadavkám na zdravie a bezpečnosť uvedeným v prílohe II. Notifikovaný orgán NB 2163 Universal Certification and Surveillance Service Trade Ltd. Co. vykonal EÚ skúšku typu (modul B) podľa prílohy V a vydal certifikát EÚ skúšky typu č. 2163-PPE-640. Všetka podporná dokumentácia sa uchováva u výrobcu. **Toto vyhlásenie o zhode bolo vydané na výhradnú zodpovednosť výrobcu.**

### **EU TYPE EXAMINATION CERTIFICATE**

#### Certificate Nr: 2163-PPE-640

Respiratory protective devices, filtering half masks to protect against particles manufactured by

AnDum Protective Equipment Technology (Changzhou) Co., Ltd.

No.63 Donghu Road, Henglin town, Wujin Area, Changzhou, Jiangsu, CHINA are tested and evaluated according to

EN 149:2001+A1:2009 Respiratory Protective Devices Filtering Half Masks To Protect Against Particles Requirements, Testing, Marking

Based on the type examination conducted with the evaluation of test reports, technical file according to Personal Protective Equipment Regulation (EU) 2016/425 Annex 5, it is approved that the product meets the requirements of the regulation. The details of essential requirement compliance is given in technical report numbered 2163-PPE-641.

#### **Product Definition**

Brand Name: AnDum Model: AD-1001

Filtering half mask
Total Inwards Leakage: Class – FFP2

Here by the manufacturer is allowed to use notified body number (2163) and can fix CE mark, as shown below, on the Category III product models given above, with;

- Issuing an appropriate EU Declaration of Conformity according to Personal Protective Equipment Regulation (EU) 2016/425 Annex 9.
- Ongoing successful performance in fulfilment of the requirements set out in Personal Protective Equipment Regulation (EU) 2016/425 and harmonised standards, ensured by assessments based on Annex 7 (Module C2) or Annex 8 (Module D) of the regulation no later than 1 year from the beginning of serial production

This certificate is initially issued on 28/04/2020 and will be valid for 5 years if there is no change in the relevant harmonised standard affecting the essential health and safety requirements.

### CERTIFIKÁT EU O TYPU PŘEZKOUŠENÍ

#### Certifikát číslo: 2163-PPE-640

Ochranné prostředky dýchacích orgánů, filtrační polomasky na ochranu před částicemi vyrobenými firmou

AnDum Protective Equipment Technology (Changzhou) Co., Ltd. číslo.63 Donghu Road, Henglin town, Wujin Area, Changzhou, Jiangsu, CHINA jsou testovány a hodnoceny podle

EN 149:2001+A1:2009 Ochranné prostředky dýchacích orgánů - Filtrační masky na ochranu proti částicím -Požadavky, testování, značení

Na základě typové zkoušky provedené s hodnocením protokolů o zkouškách, technické dokumentace podle nařízení o osobních ochranných prostředech (EU) 2016/425, příloha 5, je schválen že produkt splňuje požadavky nařízení. Podrobnosti základního požadavku shoda je uvedena v technické zprávě číslované 2163-PPE-641.

#### Popis produktu

Název : AnDum Model: AD- 1001 Respirační maska Ochranná třída propustnosti : Class - FFP2

Zde může výrobce používat číslo oznámeného subjektu (2163) a může opravit značku CE, jak je ukázáno níže, u výše uvedených modelů produktů s kategorií III;

- Vydání příslušného prohlášení EU o shodě podle nařízení o osobních ochranných prostředcích (EU) 2016/425, příloha 9.
- Probíhající úspěšný výkon při plnění požadavků stanovených v nařízení o osobních ochranných prostředcích (EU) 2016/425 a harmonizovaných normách zajištěných posouzeními na základě přilohy 7 (modul C2) nebo přilohy 8 (modul I)) nařízení nesmí být starší než 1 rok od začátku sériové výroby

Tento certifikát je původně vydán dne 28/04/2020 a bude platný po dobu 5 let, pokud není změna příslušné legislativní normy ovlivňující základní zdraví a bezpečnost

# **EU TYPE EXAMINATION CERTIFICATE**

Certificate No: 2163-PPE-640

Respiratory protective devices, filtering half masks to protect against particles manufactured by

AnDum Protective Equipment Technology (Changzhou) Co., Ltd. No. 216, Qianjie, Hengshanqiao Town, Changzhou Economic Zone, Changzhou City, Jiangsu Province, China

are tested and evaluated according to

### EN 149:2001 + A1:2009 Respiratory Protective Devices -Filtering Half Masks to Protect Against Particles -Requirements, Testing, Marking

Based on the type examination conducted with the evaluation of test reports, technical file according to Personal Protective Equipment Regulation (EU) 2016/425 Annex 5, it is approved that the product meets the requirements of the regulation.

#### **Product Definition**

Single shift use particle filtering half mask for protection against solid and liquid aerosols, is a folding type, 5 layers cotton and polypropylene fabrics, without valve, fitted with ear loops, with inside nose clip.

Brand Name: AnDum Model: AD-1001 Classification: FFP2 NR

Model have Light Green, Rose, Dark Green, Atrovirens, Orange, Bright Red, Pink, Light Blue, Dark Blue, Purple, Cream, Gray, Coffee, Black, Slate Blue and Camouflage versions

Here by the manufacturer is allowed to use notified body number (2163) and can fix CE mark, as shown below, on the Category III product models given above, with;

- Issuing an appropriate EU Declaration of Conformity according to Personal Protective Equipment Regulation (EU) 2016/425 Annex 9.
- Ongoing successful performance in fulfilment of the requirements set out in Personal Protective Equipment Regulation (EU) 2016/425 and harmonised standards, ensured by assessments based on Annex 7 (Module C2) or Annex 8 (Module D) of the regulation

This certificate is initially issued on 28/04/2020 and will be valid for 5 years, if there is no change in the relevant harmonised standard affecting the essential health and safety requirements.

Suat KAÇMAZ
UNIVERSAL CERTIFICATION
Director

This certificate is re-issued on 16.12.2020 (Rev1) with coloured versions of the model. For details refer to the technical evaluation report provided to the manufacturer.

#### TECHNICAL ASSESSMENT REPORT

REPORT DATE / NO: 16.12.2020 / 2163-KKD-641 /R1

Initial Report Date and Number: 28.04.2020 / 2163-KKD-641

This technical evaluation report is enriched and updated with the use of the same fabric as defined in the initial technical file with colored versions in the outher most layer of the mask and earloops. There is no other design or material change in the colored versions of the model. See relevant test reports on the material innocousness of the material.

Manufacturer: AnDum Protective Equipment Technology (Changzhou) Co., Ltd.

Address: No. 216, Qianjie, Hengshanqiao Town, Changzhou Economic Zone, Changzhou City, Jiangsu Province, China This report is for the, given above, manufacturer, prepared according to the test results obtained from Ningbo Customs

District Technology Center accredited by CNAS (Chinese Accreditation Body), signatory to ILAC MRA, with number CNAS L0317 for the product identified below, dated 03.08.2020 with Number KZ2021740 based on EN 149: 2001 + A1: 2009 standard and test reports on the material safety by means of toxic, carcinogen, irritationg and sensitivity evaluation.

The technical file of the manufacturer dated 03.12.2020 version 1, and risk evaluation against the essential health safety requirements and the test report evaluated for their relation with Essential Requirements of Personel Protective Equipment Regulation and found to be appropriate.

This report is an annex and an integral part of the EU Type Examination Certificate issued to the manufacturer. The test results and issued certificate belongs only to the tested model. The technical report consists of a total of 6 pages.

**Product Description:** Single shift use particle filtering half mask for protection against solid and liquid aerosols, is a folding type, 5 layers cotton and polypropylene fabrics, without valve, fitted with ear loops, with inside nose clip.

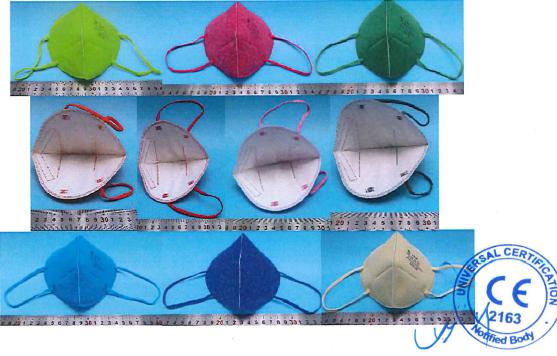

#### **Component and Materials:**

Component	Material	Grade / Size	
1st layer (Outer)	Non-Wowen Fabric	60 g/m <sup>2</sup> (±2 g/m <sup>2</sup> )	
2nd layer	ES Heat sealing cotton	$35 \text{ g/m}^2 (\pm 2 \text{ g/m}^2)$	
3rd layer	Melt-blown - non-wowen fabric	25 g/m <sup>2</sup> (±2 g/m <sup>2</sup> )	
4th layer	Melt-blown - non-wowen fabric	$25 \text{ g/m}^2 (\pm 2 \text{ g/m}^2)$	
5th layer (Inner)	Non-Wowen Fabric	$28 \text{ g/m}^2 (\pm 2 \text{ g/m}^2)$	
Internal Nose Clip	PE White Plastic	81 mm (±2 mm)	
Ear Loop Chinlon		18.5 cm (±2 cm)	

Classification: FFP2 NR

Brand Name: AnDum Model: AD-1001

Colored samples of the mask

UFR-383 12.12.2018 Rev.01

Page 1|6

# THE CLAUSES OF EN 149: 2001 + A1: 2009 STANDARD RELATED TO EUROPEAN UNION DIRECTIVE EU 2016/425 REQUIREMENTS

#### 1.1. Design principles

#### 1.1.1. Ergonomics

PPE must be so designed and manufactured that in the foreseeable conditions of use for which it is intended the user can perform the risk related activity normally whilst enjoying appropriate protection of the highest prossible level.

#### 1.1.2. Levels and classes of protection

#### 1.1.2.1. Highest level of protection possible

The optimum level of protection to be taken into account in the design is that beyond which the constraints by the wearing of the PPE would prevent its effective use during the period of exposure to the risk or normal performance of the activity.

#### 1.1.2.2. Classes of protection appropriate to different levels of risk

Where differing foreseeable conditions of use are such that several levels of the same risk can be distinguished, appropriate classes of protection must be taken into account in the design of the PPE.

#### 1.2. Innocuousness of PPE

#### 1.2.1. Absence of risks and other inherent nuisance factors

PPE must be so designed and manufactured as to preclude risks and other nuisance factors under fore seeable conditions of use.

#### 1.2.1.1. Suitable constituent materials

The materials of which the PPE is made, including any of their possible decomposition products, must not adversely affect the health or safety of users.

#### 1.2.1.2. Satisfactory surface condition of all PPE parts in contact with the user

Any part of the PPE that is in contact or is liable to come into contact with the user when the PPE is worn must be free of rough surfaces, sharp edges, sharp points and the like which could cause excessive irritation or injuries

#### 1.2.1.3. Maximum permessible user impediment

Any inpediment caused by PPE to movements to be made, postures to be adopted and sensory perception must be minimized; nor must PPE cause movements which endanger the user or other persons.

#### 1.3 Comfort and effectiveness

#### 1.3.1. Adaptation of PPE to user morphology

PPE must be designed and manufactured in such a way as to facilitate its correct positioning on the user and to remain in place for the foreseeable period of use, bearing in mind ambient factors, the actions to be carried out and the postures to be adopted. For this purpose, it must be possible to adapt the PPE to fit the morphology of the user by all appropriate means, such as adequate adjustment and attachment systems or the provision of an adequate range of sizes.

#### 1.3.2. Lightness and design strength

PPE must be as light as possible without prejudicing design strength and efficiency.

Apart from the specific additional requirements which they must satisfy in order to provide adequate protection against the risks in question (see 3), PPE must be capable of withstanding the effects of ambient phenomena inherent under the foreseeable conditions of use

#### 1.4. Information supplied by the manufacturer

The notes that must be drawn up by the former and supplied when PPE is placed on the market must contain all relevant information on:

- a) In addition to the name and addressof the manufacturer and/or his authorized representative established in the Community
- Storage, use, cleaning, maintenance, servicing and disinfection, cleaning, maintenance or disinfectant protection recommended by manufacturers must have no adverse effect on PPE or users when applied in accordance with the relevant instructions;
- c) Performance as recorded during technical tests to check the levels or classes of protection provided by the PPE in guestion;
- d) Suitable PPE accessories and the characteristics of appropriate spare parts;
- e) The classes of protection appropriate to different levels of risk and the corresponding limits of use;
- f) The obsolescence deadlineor period of obsolescence of PPEor certain of its components;
- g) The type of packaging suitable for transport;
- h) The significance of any markings(see 2.12)
- i) Where appropriate the references of the Directives applied inaccordance with Article5(6) (b);
- j) The name, address and identification number of the notified body involved in the design stage of the PPE

These notes, which must be precise and comprehensible, must be provided at least in the official language(s) of the member state of destination

Page 2 | 6

#### 2. ADDITIONAL REQUIREMENTS COMMON TO SEVERAL CLASSES OR TYPES OF PPE

#### 2.1. PPE incorporating adjustment systems

If PPE incorporates adjustment systems, the latter must be designed and manufactured so that, after adjustment, they do not become undone unintentionally in the foreseeable conditions of use.

#### 2.3. PPE for the face, eyes and respiratory system

Any restriction of the user's face, eyes, field of vision or respiratory system by the PPE shall be minimised.

The screens for those types of PPE must have a degree of optical neutrality that is compatible with the degree of precision and the duration of the activities of the user.

If necessary, such PPE must be treated or provided with means to prevent misting-up.

Models of PPE intended for users requiring sight correction must be compatible with the wearing of spectacles or contact lenses.

#### 2.4. PPE subject to ageing

If it is known that the design performance of new PPE may be significantly affected by ageing, the month and year of manufacture and/or, if possible, the month and year of obsolescence must be indelibly and unambiguously marked on each item of PPE placed on the market and on its packaging.

If the manufacturer is unable to give an undertaking with regard to the useful life of the PPE, his instructions must provide all the information necessary to enable the purchaser or user to establish a reasonable obsolescence month and year, taking into account the quality level of the model and the effective conditions of storage, use, cleaning, servicing and maintenance.

Where appreciable and rapid deterioration in PPE performance is likely to be caused by ageing resulting from the periodic use of a cleaning process recommended by the manufacturer, the latter must, if possible, affix a marking to each item of PPE placed on the market indicating the maximum number of cleaning operations that may be carried out before the equipment needs to be inspected or discarded. Where such a marking is not affixed, the manufacturer must give that information in his instructions.

#### 2.6. PPE for use in potentially explosive atmospheres

PPE intended for use in potentially explosive atmospheres must be designed and manufactured in such a way that it cannot be the source of an electric, electrostatic or impact-induced arc or spark likely to cause an explosive mixture to ignite.

#### 2.8. PPE for intervention in very dangerous situations

The instructions supplied by the manufacturer with PPE for intervention in very dangerous situations must include, in particular, data intended for competent, trained persons who are qualified to interpret them and ensure their application by the user.

The instructions must also describe the procedure to be adopted in order to verify that PPE is correctly adjusted and functional when worn by the user. Where PPE incorporates an alarm which is activated in the absence of the level of protection normally provided, the alarm must be designed and placed so that it can be perceived by the user in the foreseeable conditions of use.

### 2.9. PPE incorporating components which can be adjusted or removed by the user

Where PPE incorporates components which can be attached, adjusted or removed by the user for replacement purposes, such components must be designed and manufactured so that they can be easily attached, adjusted and removed without tools.

#### 2.12. PPE bearing one or more identification or recognition marks directly or indirectly relating to health and safety

The identification or recognition marks directly or indirectly relating to health and safety affixed to these types or classes of must preferably take the form of harmonized pictograms or ideograms and must rem ain perfectly legible throughout the foreseeableuseful life of the PPE. In addition, these marks must be complete, precise and comprehensible so as to prevent any misinterpretation; in particular, where such marks incorporate words or sentences, the latter must appear in the official language(s) of the Member State where the equipment is to be used.

If PPE (or a PPE component) is too small to allow all or part of the necessary marking to be affixed, the relevant information must be mentioned on the packing and in the manufacturer's notes.

#### 3. ADDITIONAL REQUIREMENTS SPECIFIC TO PARTICULAR RISKS

#### 3.10.2. Protection against cutaneous and ocular contact

PPE intended to prevent the surface contact of all or part of the body with substances and mixtures which are hazardous to health or with harmful biological agents must be capable of preventing the penetration or permeation of such substances and mixtures and agents through the protective integument under the foreseeable conditions of use for which the PPE is intended.

To this end, the constituent materials and other components of those types of PPE must be chosen or designed and incorporated so as to ensure, as far as possible, complete leak-tightness, which will allow where necessary prolonged daily use or, failing this, limited leak-tightness necessitating a restriction of the period of wear.

Where, by virtue of their nature and the foreseeable conditions of their use, certain substances and mixtures which are hazardous to health or harmful biological agents possess high penetrative power which limits the duration of the protection provided by the PPE in question, the latter must be subjected to standard tests with a view to their classification on the basis of their performance. PPE which is considered to be in conformity with the test specifications must bear a marking indicating, in particular, the names or, in the absence of the names, the codes of the substances used in the tests and the corresponding standard period of protection. The manufacturer's instructions must also contain, in particular, an explanation of the codes (if necessary), a detailed description of the standard tests and all appropriate information for the determination of the maximum permissible feetiod of wear under the different foreseeable conditions of use.

UFR-383 12.12.2018 Rev.01

Article 7.17.2	Clogging: This test is not applied to Particle Filtering Half Mask which is not reusable.  (For single shift use devices, the clogging test is optional test. For re-usable devices test is mandatory.)
Article 7.17.3	Penetration of filter material: This test is not applied to Particle Filtering Half Mask which is not reusable.
Article 7.18	Demountable Parts: There are no demountable parts on the product.
	Marking – Packaging: Necessary markings are available on the product package (box). The name and trademark of the manufacturer is stated to exist on the carton boxes. The type of the mask and the classification including the status of re-usability, the reference to EN 149:2001+A1:2009 standard, the year of end of shelf life, using and storage instructions and pictograms and CE mark are available on the product package. The above evaluation is based on the technical document for packaging and marking, for box design. Verified on the annex 9.1 and annex 6 of the technical file.
Article 9	The technical documentation for mask design (drawing) also evaluated for marking requirements, drawing Annex 6. The mask template (drawing) indicates that the mask will carry information about the brandname of the manufacturer, type of mask, the reference to EN 149+A1:2009 standard and classification including the re-usability of the mask. The manufacturer also printed CE mark with our Notified Body number. The mask do not have sub-assemblies. The tested samples by the laboratory carry necessary marking information as stated in the technical documentation, the manufacturer shall follow marking instructions for serial production. AD-1001 drawing which exists in the technical file of the manufacturer, Annex 6 of technical file.
	The manufacturer shall pay attention on the colored samples that the markings shall be easily readable on the mask.
Article 10	Information to be supplied by the manufacturer: In each of the smallest commercially available packaging of the product, implementation (installation instructions) pre-use controls, warning and usage limitations, storage and meanings of symbols / pictograms are defined. User instruction document in the technical file found to be appropriate, Annex 8. The manufacturer shall include this documented user information text in every smallest commertially available package.
